

## February's here—and we've got updates worth your attention.

This month: AI-powered insights in Intelligence Hub, new carrier integrations, a regulatory heads-up on EU requirements, and everything you missed at The Delivery Conference. Let's get into it.

### What's New in Intelligence Hub

Turn questions into instant delivery insights with Ask AI in Intelligence Hub. Use natural language and get personalised recommendations from your shipping data.

Role-based dashboards in Intelligence Hub give teams instant clarity, track key KPIs, and resolve issues before customers feel them.

Predict with AI in Intelligence Hub forecasts delivery risks early, spot delays, act sooner, cut costs, and protect delivery accuracy.

Use our Delivery Options Component to elevate checkout fast—adding convenience, choice, and certainty with minimal development effort.

#### Reminder: EU 'stop words' now in effect

As of 1 January 2026, the EU requires improved data quality for imports—including a list of restricted terms on customs declarations. This applies to shipments into the EU and Northern Ireland.
